Hi Brian,

Thank you for the phone call today. Hope your summer is going well. I touched bases with Mike Camin when he got back to the office and had a chance to review the mixing zone analysis that you drafted for Clearwater Paper's NPDES permit. At this time we do not have any major concerns and Mike didn't see anything more he thought it needed from the engineering side.

Please let me or Mike know if you have any other questions or concerns.

Thanks Brian,

Cindy Barrett
